Our Goal

Providing the best Quality of Products,
Response Time, and Service, to enhance
Customer Experience & Satisfaction.

Our Moto

NEVER SAY NEVER

Section 02

Product Offering

A Collection of Global Products Offering
Innovation, Leadership, Quality, Performance.

Introduction - Antares Access Floors

It is essential for Access Floors to meet the design requirement for both present and future occupancy of the building in which they are installed. Antares Access Floors provides the solution by simply complying with all international standards. Every component in the system has been rigorously tested to meet the most stringent international standards, providing a degree of quality assurance on which specifiers and users can rely to deliver the best product and performance.

In responding to customer needs, we concentrate our efforts in producing premium systems, renowned for their consistency of quality, proven strength and stability, all of which contributes to the structural fabric of the building.

Antares products are subject to a process of continual improvement. Due consideration is given to systems currently in service throughout the world, enabling us to respond to the current and changing needs of the users.

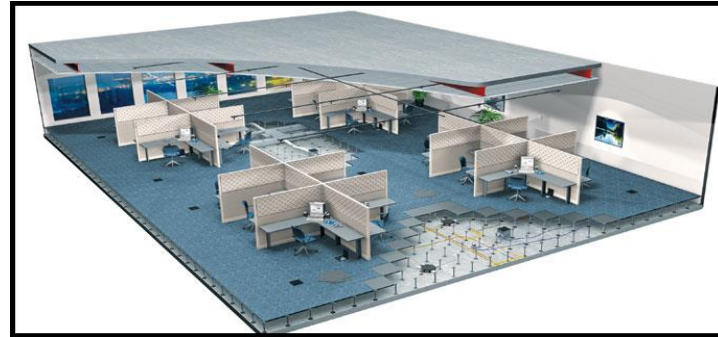

At Antares we are available to assist specifiers and users to offer advice on Access Floors. From initial inquiry to specifications, budgeting, supply, installation, and maintenance, we are pleased to be of help and at service whenever you want.

Antares Access Floor Systems

Cornerlock System: Offering the Finish Floor Height from 75mm to 600mm, Bare Steel Panels are supplied and installed in Powder Coated Epoxy Paint Finish ready to accept an independent floor covering on site. Location of the panel is positively retained using Cornerlock Screws fixed directly to pedestals.

Stringer System: Stringers are located on pedestals, creating a 600mm x 600mm grid, which enhances stability of the floor and improves the load performance. Offering the Finish Floor Height from 75mm to 1000mm, the panels are supplied and installed in factory fitted floor coverings such as Anti-Static High Pressure Laminate (HPL) or Vinyl. The panels are loose laid into the grid.
